**GREEN WORLD TRAVEL  
Four Natural Wonders of the World**

Our tour of four Natural Wonders of the World begins on 22nd June. First, we're going to fly to the Grand Canyon in Arizona, USA. The Colorado River formed this extraordinary canyon. You can see two billion years of the world's history in its walls!

Our next adventure begins with a trip on the ocean. We're sailing around the Great Barrier Reef in Australia. The reef is 1,031 kilometres of coral and it's the home of some amazing fish. There are sharks too, but don't worry. We're not going near those!

Mount Everest in the Himalayas is our third stop. We're walking to the mountain, but we aren't going up it. One hundred and fifty people died on Mount Everest and only 700 reached the top. It's 8,85 kilometres high and the temperature goes from -60 degrees in the winter to -19 degrees in the summer!

Finally, we are travelling to Africa to visit the Victoria Falls, the largest waterfall in the world. It is 1,7 km wide and 108 metres high. It is located on the border between Zambia and Zimbabwe. We are taking a helicopter to enjoy the spectacular views. The best months to view the falls are June and July.

**1. Answer the following questions. Write a complete sentence. (Contesta las siguientes preguntas. Responde con una respuesta larga) (0,5 points each= 2 points)**

1. Where is the Grand Canyon located?

---
